Month

Day

Year

Natural Gas

Your natural gas dial meter read:

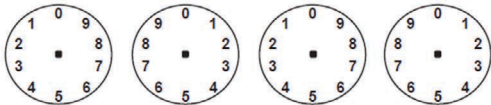

□	□	□	□
---	---	---	---

Meter read date: _____ / _____ / _____

Month

Day

Year

Tips for reading your gas meter:

- Mark the dials from left to right.
- Take note of the direction of the arrows on the display.
- Draw the pointer on the dials as displayed on your gas meter.
- If the pointer is between two numbers, select the lower number.
 - ↳ If the pointer is between 9 and 0, 9 is the lower number.
- When the pointer is directly on the number, look at the dial to its right.
 - ↳ Has the dial on the right has passed 0? If yes, use the number that the pointer is on.
 - ↳ If the dial on the right has not passed "0," use the number less than what the pointer is on.

Example:
