

How to Read Your NorthWestern Energy Bill

Utility bills can be complicated – with all the abbreviations, industry jargon, regulatory requirements and tiny print – it’s no wonder that most customers only look at the amount that is due each month. But the more you know about your energy use, the better you’ll be able to help manage it. This fact sheet provides detail on the separate pieces that make up your bill and information about ways we work to manage costs.

If you have questions or concerns about your bill, give us a call or send us an email. We can put you in touch with a representative who can explain your charges line by line, or help you determine if a better billing or payment option is available for your account.

- 1 This is your utility account name, account number, account description (if known – might be blank), and bill date.
- 2 This is your service address for this account.
- 3 The date payment is expected to be paid.
- 4 The amount you are expected to pay by due date.
- 5 Graphs demonstrating your energy usage (kWh or Therms) for a 13 month period.
- 6 This section of the bill provides you with comparison information allowing you to compare your days of service, energy usage, costs, and average daily temperatures with the same period last year and the prior month.
- 7 This section is a snapshot of your account since your last bill. It includes the balance from your previous bill, payments, current charges, miscellaneous services, or adjustments processed on your account as well as your total amount taxed for the month

- 8 This section summarizes the current charges associated with your electric and/or gas service.
- 9 For customers not currently participating in your budget billing program, we will provide you with an approximate budget billing amount if you were to sign up for the program. For those customers on our budget billing program, a summary of your actual accounts receivable information is provided.
- 10 This section contains important information related to your account or service.
- 11 This message section will provide you with helpful energy saving tips and rate change information.
- 12 This is the portion of the bill you detach and return with your bill payment

(continued on back)

- 1 Contact information for NorthWestern Energy.
- 2 This is the start and end date of your current meter reading.
- 3 The total number of days included in the current meter reading.
- 4 The meter reading obtained on the starting or "from" date and the meter reading obtained on the end or "to" date.

4 Identifies if current read obtained was an actual read or an estimated read.

6 The number that, when multiplied by the metered usage, determines the actual energy (kWh, Demand, or Therms) used.

7 The total amount of electricity or natural gas used during the period.

8 A measurement taken by a demand meter every 15 minutes to calculate the amount of energy a customer requires of the system. Most residential customers do not have demand meters.

9 The identification number of the meter located at your service address.

10 The code and description to identify the rate at which your service is billed.

11 A summary of charges associated with delivery charges. Delivery charges are those items related to the operation of NorthWestern Energy's system to deliver the energy to the customer along with other miscellaneous charges including competitive transition and public purpose programs. These charges are subject to regulation by state utility commissions and, where appropriate, the Federal Energy Regulatory Commission.

12 Phone numbers for paying your bill.

13 Contact information for the applicable utility commission.

14 This section provides the detail rate information for charges in the Delivery Service section of the bill. The rates presented are the most current rates in effect.

15 These sections provide the detail rate information for charges in the Supply section of the bill. The rates presented are the most current rates in effect.

16 Information explaining how your payments are processed.

17 This section contains a summary of the state and local taxes you must pay based on your usage.

Understanding Your Bill

Knowing some common terminology will help you understand how your bill adds up. Here are some explanations to commonly used terms:

- Avg. daily temp (°F): this is each day's average temperature for the billing cycle divided by the days of service. The lower the average temperature for a month, the more usage will be required to heat your home or business.
- Days of Service: The number of days in the billing period. Number of days may fluctuate between months. In winter months, a few days more or less in your billing period will affect your bill.
- Therm: unit of measurement used to determine how much gas you used for a month. Your gas meter measures in cubic feet. We use a multiplier to convert cubic feet into therms. The multiplier varies depending on the altitude of where you live as well as the heat content of the gas that we provide.
- kW: kilowatt, which equals 1,000 watts of electricity.
- kWh: kilowatt-hour, unit of measurement used to determine how much electricity you used for a month.
