

Every year, Jill Taylor and her best friend Sheila get together to bake Christmas treats.

"We start early in the morning and we get done at supper time," said Jill, who works at NorthWestern Energy as a Gas Supply Analyst. "We do a marathon baking day."

Then they divvy up the baked goods and give them out to families, friends, neighbors and coworkers.

Jill and Sheila have been baking together for more than 20 years.

"We started doing it years and years ago, and we haven't missed a year," Jill said.

The friends have some favorite recipes they make year after year, but they also like to find new recipes.

"Each year, we try to come up with something fun and brand new," Jill said.

Last year, one of their new recipes was Christmas Tree Rice Krispies Treats, and they were such a hit that they plan to make them again this year.

At work, Jill forecasts and purchases the amount of natural gas supply we need for our Nebraska and South Dakota customers. Some of the things she looks at are weather forecasts, past heating and cooling degree days, historical usage, storage levels, and daily and future pricing.

One of Jill's favorite things about her job is her coworkers.

"I feel very fortunate to work alongside such great people," she said.

Jill works with many different departments in the company and is constantly impressed by how well everyone works together.

"It takes everybody to do their job to get the results that we need to provide safe, reliable and quality service to our customers," she said.

Christmas Tree Rice Krispies Treats

INGREDIENTS

3 tablespoons salted butter, cut into 1-tablespoon pieces 1 (10-ounce) bag mini marshmallows

Green gel food coloring

6 cups Rice Krispies cereal

White decorating icing

16 miniature Reese's peanut butter cups, unwrapped

Round red sprinkles

16 star sprinkles or yellow mini M&Ms

INSTRUCTIONS

1 Melt butter in a large saucepan over mediumlow heat.

2 Add in marshmallows and stir until melted, while tinting with green food coloring to reach desired shade.

Remove from heat and add in Rice Krispies cereal. Fold mixture until evenly coated. Let cool about 5 minutes.

 $4 \, \mathrm{Spray}$ hands with non-stick cooking spray and shape about $1/3 \, \mathrm{cup}$ to $1/2 \, \mathrm{cup}$ of the mixture into a cone. Press firmly while shaping the cones, so they hold together.

(Recipe adapted from Family Circle.)

Montana | December 2023

In this issue: Your energy dollar | Affordability is our mission | Christmas treats

Use LED lights to decorate

The electricity for a modest LED holiday light display is about \$2 for the holiday season, compared to \$10-\$15 for traditional incandescent lights.

Understanding your energy dollar

Flow-through costs

These are charges that NorthWestern Energy does not control. In this category, our cost is passed on directly to our customer. There is no mark-up, and NorthWestern Energy does not make profit from these costs. This includes:

- **Electricity and natural gas supply** This is the cost of the energy you use.
- Property taxes NorthWestern Energy pays property taxes to the state of Montana, those taxes are passed on to our customers, so we are collecting taxes on behalf of the state for the services needed by Montanans. NorthWestern Energy's customers recieve a pass through that is approximately three times the property taxes in their utility bills compared to our peer group average.

Affordability is our mission

NorthWestern Energy's mission statement calls out affordability: "Working together to deliver safe, reliable and affordable energy solutions that create value for customers, communities, employees and investors."

Electricity is an amazing value

A dozen chicken eggs:

1922 = **\$0.35** ► Today = **\$4.24**

Percent increase = 1,111%

An electric range on which to cook:

1922 = **\$168** ► Today = **\$1,000**

Percent increase = 495%

A kilowatt hour of electricity:

1922 = **\$0.10** ► Today = **\$0.14**

Percent increase = 40%

Electricity*

Natural Gas†

Base costs

These are the costs that NorthWestern Energy controls (with approval from the Montana Public Service Commission). This includes:

- **Delivery charges** This is the cost of the wires, poles, substations, compressor stations and pipelines that deliver natural gas and electricity to your home. We invest heavily in our electric grid and natural gas system. Without that investment, we would not be able to consistently deliver reliable energy. In 2022, we spent nearly \$500 million on capital expenditures in Montana.
- Monthly service fees These fees cover a portion of the costs needed to get customers set up to receive service such as the costs of our customer care system, including our contact center, walk-in offices, online bill pay, website and other services we offer to customers.
- **Electric generation resources** NorthWestern Energy owns a balanced and diverse mix of electric generation resources, in order to provide our customers reliable energy at the lowest long-term cost.

Take control of your energy dollar

We offer various programs to help you save energy and money. We have energy efficiency tips, Home EnergyChecks, energy-saving rebates and more. We can also help you determine if you qualify for energy assistance programs. Learn more at NorthWesternEnergy. com/waystosave or give us a call at (888) 467-2669.
